HELI

OPSM Light Type Order-picking Truck

Characteristics

 The width of the passageway is only 1 meter and the turning passageway is 2 meters. The truck is compact, and it can easily pass through the workshop aisle and low doors, which can widely be used in retail, storage center, library and other narrow spaces;

2. The truck featureselectric lifting and travelling. When the lifting height is more than 0.5m, the truck will automatically decelerate which not only saves time and labor but also be safe and stable;

 The front tray can adjust its height freely to realize the convenient storage of large and small goods;

4. The truck adopts double safety protection measures. When the driver's hands or feet extend out of the truck body, the truck will stop driving to avoid pinching the driver;

5. Independent fingertip control system, including control on acceleration, lifting, tortoise speed, emergency stop is comfortable for operation.
