

Configuration	
Parts	High configuration
Smart safety parts	Bi-pneumatic transmission box
	Electric-hydraulic proportional control valve
	Wet type brake drive axle
	HELI smart safety buffering system
	Hydraulic service brake
	Stepless speed limit from 5km/h to the maximum speed
	OPS
	Stamping overhead guard
	Self lock valve of lifting cylinder
	Smart safe control system
Comfortable parts	FICS
	9 inches cyclone air filter with dual cores (with pressure alarm)
	Power switch
	Oil tank with lock
	Fire extinguisher (2kg)
	Integrated fingertip operation system
	Electro-hydraulic parking brake
	Full suspension seat
	Lowering buffering for rear lifting cylinder, upper buffering for front lifting cylinder
	Adjustable steering column
Environment friendly parts	Reversing handle with integrated horn
	USB interface
	Hydraulic synchronized steering
	Instrument identification (hard switch or password for start)
	Fan
	Reversing speaker
	Meet the latest emission requirements (EU V, China III)
	Variable piston pump
	Load sensing steering
	LCD instrument

Note: "●" standard; "○" optional; "—" non-configuration

Configuration	
Parts	High configuration
Cab	Front windshield (with wiper)
	Rear windshield
	Panel mounted cab
	Panel mounted cab (with heater)
	Panel mounted cab (with heater and air conditioner for cooling)
	Panel mounted cab (with air conditioner for cooling)
	Panel mounted cab (with air conditioner)
	LED lights for whole truck
	LED rear working lights (2)
	Warning light (rotating)
Lights	Warning light (rotating and buzzer)
	Blue light
	Normal mast
	Full free mast (two stage or three stage)
	Non standard attachment
	Mast height
	Hydraulic fork positioner (8.5-10)
	Fork carrier (5-7t)
	backrest (5-7t)
	Sharp type fork
Others	Widener fork carrier
	Metric thread
	American thread
	Solid tyre
	Traceless solid tyre
	Sleeve for tilting cylinder
	Sleeve for steering cylinder
	Universal key
	Customer made color

CU1ZG3/CU2ZG3

HELI

**Our power and confidence are from
reliable high quality products.**

Elegance in appearance, excellent in performance

Ecology and saving

The QSF3.8 Euro V power engine of Cummins is equipped with DOC + DPF + SCR post-treatment technology meeting the most stringent emission standards;

Standard DANFOSS hydraulic variable system and load sensitive steering system are energy saving and high efficiency;

Energy saved by 10%

Smart and comfortable

Standard configuration of ZF tiptronic transmission

- Full time free gear control of front 3 / rear 3 is suitable for complex working conditions;
- The proportional valve can control the gear shift accurately and smoothly, which makes driving comfortable;
- Stepless speed limit from 5km / h to the maximum speed can be realized and it is suitable for different application;
- Electronic control system and gearbox clutch calibration function offer long-term and efficient operation through smart protection on transmission box.

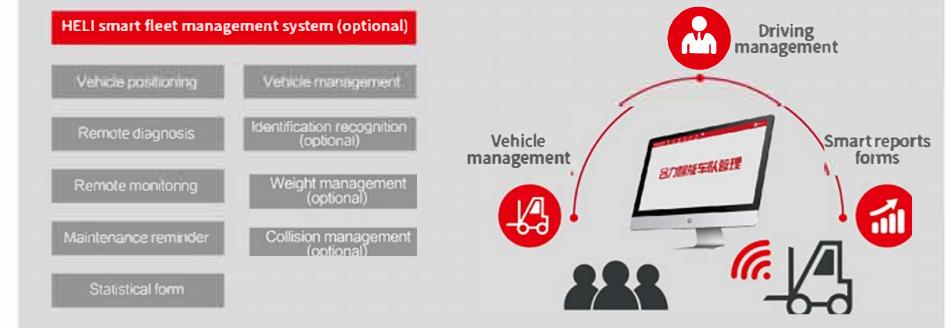

Through LCD instrument and good human-computer interaction, the operator can monitor the truck status in real time.

Electronic architecture based on CAN bus communication

- More concise wiring harness
- More efficient communication
- greatly reduce Communication failure rate, more reliable

Standard configuration of intelligent safety buffer system cushion operator from effects of riding over uneven surface and it is more comfortable.

- Vibration shock reduction**

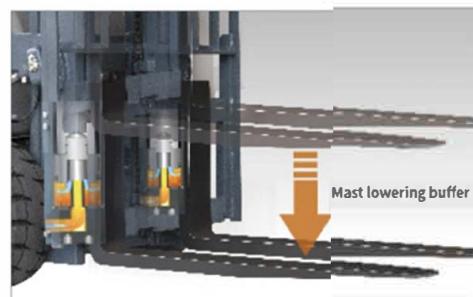

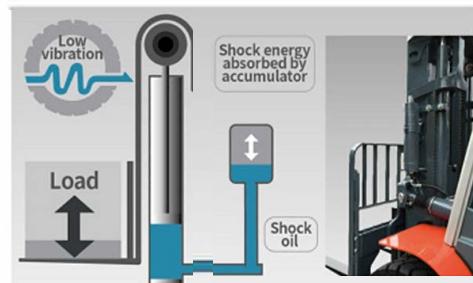

When driving under load conditions, the impact caused by uneven surface is greatly absorbed, and the vibration is effectively reduced.

- Vibration and noise reduction**

When driving under load condition, the impact noise caused by uneven surface is greatly reduced.

- Reduced driving fatigue**

During the emergency stop operation during the load lowering process, the vibration and driving fatigue caused by inertia impact can be effectively reduced, and the driving safety can be improved.

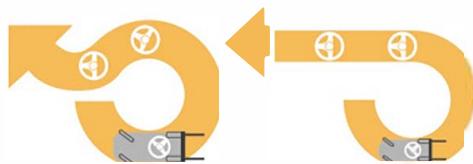

Standard configuration of oil cylinder lower buffer, comfortable operation

Multi system joint optimization design (active noise reduction of engine, transmission box, axle and hydraulic oil pump, application of sealing sound insulation materials of the whole truck) reduces truck noise.

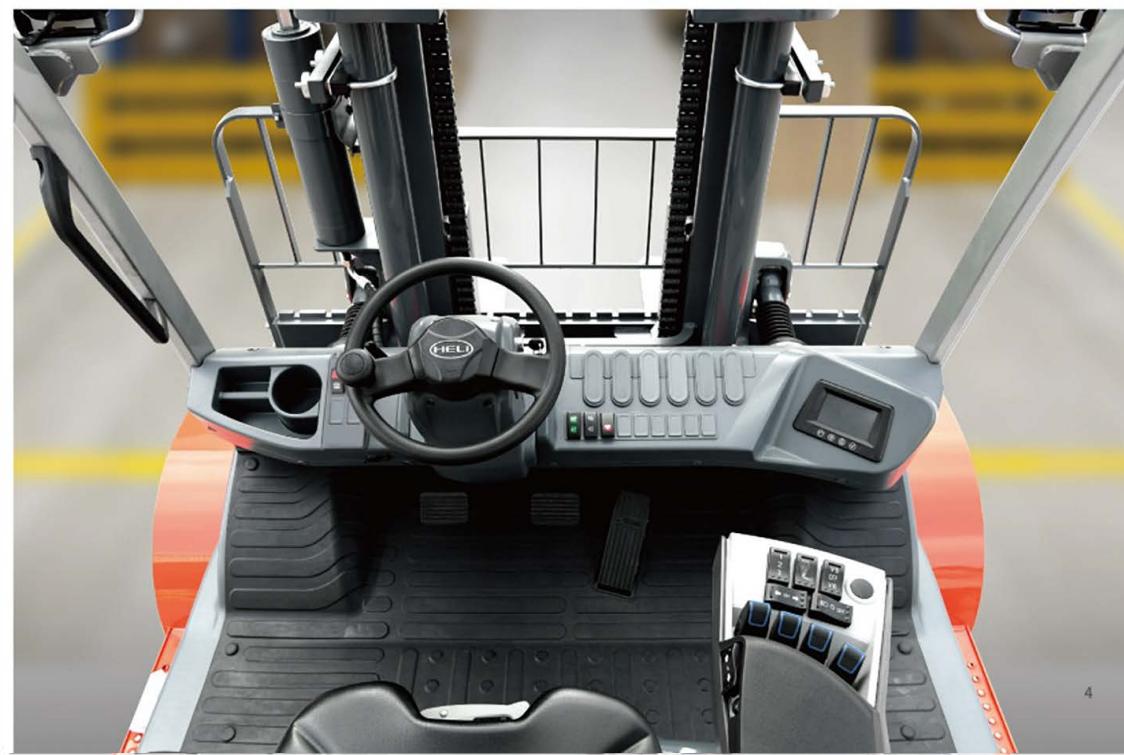

Hydraulic synchronous steering system can adjust steering wheel and wheel angle offset smartly and offers accurate steering and comfortable driving; (optional)

The truck is equipped with hydraulic electronic parking brake to prevent misoperation, the parking brake can be realized by gently touching after the truck stops.

All round man-machine system guarantees comfortable driving: the truck is equipped with armrest, full suspension seat, integrated fingertip operating system and large driving space.

High efficient and safe

Smart protection on gearbox and engine ensure the safety of the whole truck.

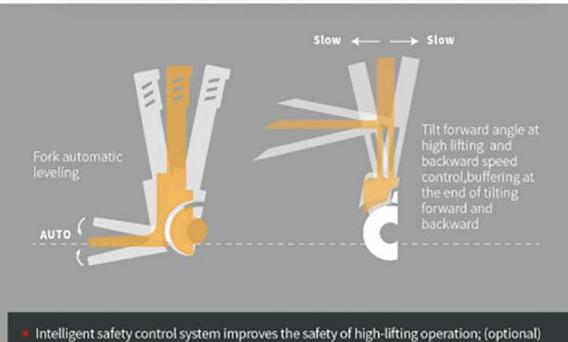

Smart protection on high engine water temperature, low oil pressure, intake pressure and temperature

- Operator present system (after the driver leaves the seat accidentally, walking and lifting function of the whole truck is terminated) prevents the potential safety hazards caused by misoperation.
- When parking brake works, truck travel function is prohibited and thus the safety of driving operation is improved;
- Start protection function, fingertip operation system and anti-restart protection function from non-neutral gear ensure operation safety;
- The truck is equipped with large capacity air filter with safety filter element and pressure alarm function;
- The optimal design of power suspension increases the limit of impact to protect the power assembly from accidental impact;
- Truck safety warning: reverse image system, warning light, etc. (optional)

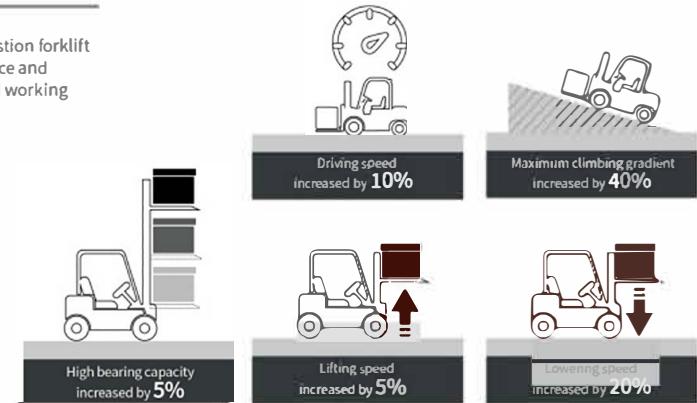

- Stamping roof type overhead guard improves the roof strength and improves the operation safety;

- Intelligent safety control system improves the safety of high-lifting operation; (optional)

G3 series 5-10t internal combustion forklift truck has improved performance and create higher efficiency at fixed working hours.

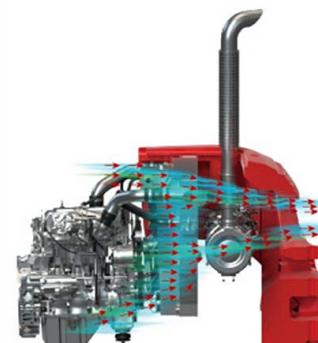

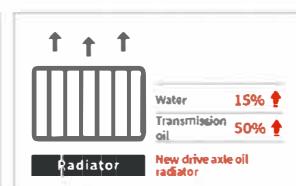

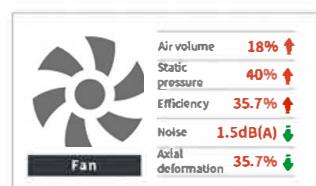

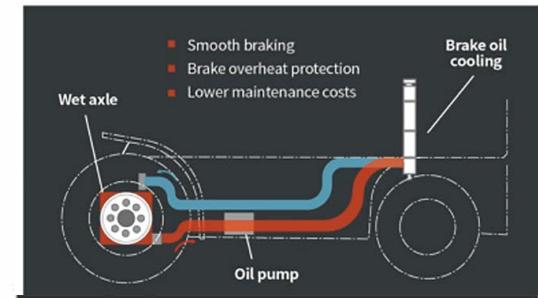

Note: the above data are from the comparison with G series 7t internal combustion forklift truck.

Reliable quality

HELI has been committed to the research of truck reliability for many years, and the core parts have been verified by the market for a long time. The truck goes through high standard reliability test before marketing, long-time quality tracking and verification after marketing, and strict control of various performance indicators.

- The CAE forward design improves the strength of structural parts;
- Wet braking with forced oil cooling radiator ensures the stability and reliability of braking performance under extreme conditions;
- High performance cooling system ensures the heat dissipation performance of the whole truck;

Note: the above data are from the comparison with G series 7t internal combustion forklift truck.

Harsh truck key parts endurance reliability test ensures the long-term reliability of core parts.

Fatigue test of drive axle

Fatigue test of steering axle

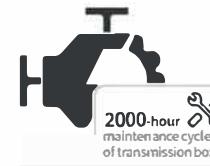

Fatigue test of lifting system

Impact test of overhead guard

Efficient and convenient maintenance

Super long maintenance cycle of core parts

Integrated electrical cabinet and embedded instrument make disassembly and maintenance easy;

Timely remind maintenance information is given through instrument;

Large opening angle hood and detachable front and rear floor make check and repair easier;

Ast: Right angle stacking aisle width
a: Clearance
l: Load Length

Note: The vertical axis stands for load capacity and the horizontal axis stands for load center which is calculated from the front surface of the forks to the gravity of the standard load. The standard load means a cubic with 1000mm edge length. When mast is tilted forward, using non-standard forks or loading large goods, the load capacity will be reduced. The load capacity of standard mast at different load center can be known from this load chart.
